THE COST OF MAMMOGRAMS FOR WOMEN UNDER AGE 40
UNDER CERTAIN CIRCUMSTANCES

WHEREAS, Senator Ellen Karcher and Senate President Richard J. Codey having recognized the need to increase access to life saving mammograms for New Jersey women have drafted Senate Bill S862 to require health, hospital, and medical service corporations, individual, small employer and larger group insurers and health maintenance organizations to provide benefits for expenses incurred in conducting mammograms for women under 40 years of age who have a family history of breast cancer or other cancer risk factors; and

WHEREAS, incidence rates for breast disease and cancer have increased to the point where one in eight women can expect to fall victim to this disease. In 2003, the American Cancer Society estimated that 7,400 new cases of breast cancer will be diagnosed among women in New Jersey, and 1,400 women will die of breast cancer. The American Cancer Society has also reported that based on analysis of statistics compiled from 1996-2000 that the average age-

adjusted mortality rates for breast cancer per 100,000 women were 27.2 nationally compared to 31.3 for New Jersey women, a mortality rate 3.5% higher than the national average; and
